CITY OF LITTLE ROCK

PETITION FOR SPEED HUMP EVALUATION STUDY

Date: _____

We, the residents of _____Neighborhood/Street, request City of Little Rock Traffic Engineering Division to conduct a speed/volume study to determine if the following street satisfies the city adopted criteria for speed hump installation:

_____
Name of affected Street

between _____ & _____
(Intersecting Streets)

Note:

1) Study will be conducted ONLY if 75% of the property owners (fronting the affected street) support speed hump installation
2) Speed Humps may be installed ONLY if funding is available and study results indicate that speed hump warrants are satisfied
3) Please make efforts to obtain signatures of ALL property owners on the affected street (whether *for* or *against*) If a property owner is unwilling to participate, you may indicate so next to the property address.
4) Signature must be of the property owner or authorized representative.
5) Only one signature per household allowed.

Name/Address of the person representing the neighborhood:_____

_____

_____Phone:_____

Return ***originals*** to: **Traffic Control Center**
Attn: Traffic Operations Supervisor
621 S. Broadway Little Rock, AR 72201

Please read carefully before signing:

While speed humps generally reduce vehicle speeds, they may also create other inconveniences such as increased vehicular noise in the vicinity of speeds humps. Also, because of spacing requirements, it is possible that a speed hump, associated pavement markings and signage may be installed adjacent to your property.
