

[Other LID Projects in Little Rock](#)

The headquarters of [Heifer International](#) on the east side of Interstate 30 in Downtown Little Rock (pin to map), and the [Hillary Clinton Children’s Library and Learning Center](#) off of Interstate 630 (pin to map) have used LID techniques in the design of their grounds. The parking lot of Heifer was probably the first in the state to utilize permeable surfaces to help filter and infiltrate the run-off from rain water.
